By Steven D. Peterson, Peter E. Jaret, Barbara Findlay Schenck . In order to put your business plan to work, you must know how your business will operate on a day-to-day basis. Your knowledge leads to the development of systems and procedures for everything from product development to sales and customer service.

## **Develop Your Business Systems and Procedures - dummies**

Developing and implementing systems allows your business to run without you. This frees up your time to focus on building your business further (and taking time off) and makes your business more attractive and valuable to potential acquirers (because it's not dependent on you and the acquirer can see how the business could continue to scale and provide value).
