Alternatively you can monitor the SPI lines and use a Logic Analyzer or micro controller to decode the signals. The downside is that you don't control the addresses that are being read and so you have to somehow generate activity to the SPI Flash and then reconstruct the flash image based on the addresses that are being accessed.

BasicFUN Series Part 1: Hardware Analysis / SPI Flash Extraction Background. A few months ago, I received one of these arcade cabinets as a gift and after playing it for about 30 seconds and being reasonably impressed with the screen quality and playability I began wondering if it might be possible to load or flash other games onto the cabinet.. These cabinets come in multiple variants and ...
