(PDF) Dynamics and regulation of goat reproduction

Goats do not have to be slaughtered to harvest the wool, which is instead sheared (cut from the body) in the case of Angora goats, or combed, in the case of Cashmere goats. However the Angora goat usually gets shorn twice a year with an average yield of about 10 pounds while the Cashmere goat grows its fiber once a year and it takes about a week to comb out by hand, yielding only about 4 ounces.
