## **Geometrical product specifications (GPS) – Dimensional**

...

ISO 6603-2 is used if a force-deflection or force-time diagram, recorded at nominally constant striker velocity, is necessary for detailed characterization of the impact behaviour. These test methods are applicable to specimens with a thickness between 1 mm and 4 mm. NOTE For thicknesses less than 1 mm, ISO 7765 should preferably be used.

## **ISO 6603-1 : Plastics - Determination of Puncture Impact**

...

ISO 6603-2 states that the specimens may be left unclamped. However, it is noted that the test results obtained for clamped and unclamped specimens may be different due to the freedom of movement that the specimen has away from the impact point. The free movement of the edges may cause vibrations with higher amplitudes in the data.
