Tire Trailer Drop Testing | Shock vs no Shock

I have brackets for shock absorbers welded to the outside of the frame. The Joy Rider system bolt on brackets mount inside the springs and drop below the axels. I'm not sure that they would be more effective than a gas shock mounted at a 40 degree angle outside the frame. Also, my brackets are at an opposing angle.

Amazon.com: trailer shocks

The Roadmaster Comfort Ride Shock Absorbers # RM-2460 is a very advanced suspension setup for tandem trailers. Unlike other shock kits that do a decent job this will give the trailer a ride almost a smooth as a passenger vehicle due to the shocks being so much better than most trailer shocks. I'd easily pick these over the Mor Ryde shocks.

Seat Parts

Joy Rider Trailer Shock Kits. Excessive, uncontrolled suspension movement fatigues leaf springs and quickly wears out suspension components. Hopping tires and bouncing springs throw interior contents repeatedly, causing damage from rubbing, colliding, drawers slamming open and furniture walking into nearby walls.

Liberty / Joy Rider - Heartland Owners

Shock Absorbers. Despite their name, shock absorbers do not absorb shock; they are technically oscillation dampers. The purpose of a shock absorber is to damp the suspension movement. When a trailer hits a bump, the suspension is compressed and moves toward the trailer's frame, absorbing the shock exerted by the road irregularity.
