Do-It-Yourself | Kids - NASA Solar System Exploration

The solar system consists of the sun and everything that orbits, or travels around, the sun. This includes the eight planets and their moons, dwarf planets, and countless asteroids, comets, and other small, icy objects. However, even with all these things, most of the solar system is empty space. The solar system itself is only a small part of a huge system of stars and other objects called the Milky Way galaxy.

solar system - Kids | Britannica Kids | Homework Help

The solar system. Toggle text. The solar system is our neighborhood in space. It is a collection of planets and smaller objects, all traveling around a

central star, the sun. The sun is a vast ball of glowing hot gas. It is so big and heavy that its gravity pulls all the objects in the solar system in orbit around it.
